Intelligent assistant

iDensityControl  iProductionManager  iCookingSuite  iCareSystem 

iDensityControl

iDensityControl is the iCombi Pro's intelligent climate management. The interaction among intelligent sensors, a high-performance heating system and fresh steam generator, and active dehumidification ensures that the right cooking cabinet climate is always available. Intelligent air circulation ensures the best possible energy input into the food. Consequently, this ensures extraordinary productivity while maintaining high levels of food quality, even cooking and minimum energy consumption.

iCookingSuite

The iCookingSuite is the iCombi Pro's cooking intelligence. The user starts by selecting the right cooking path for the food, choosing from among 6 operating modes and / or 5 cooking methods. Users also specify the desired cooking result. The unit suggests settings for browning and degree of doneness. Intelligent sensors detect the size, quantity and condition of the food. While the cooking path is in progress, the system adjusts key parameters like cooking cabinet temperature, airspeed, and cooking time accurately to the second. The selected desired results are achieved, yielding the best possible quality in the shortest possible time. It is possible to optionally influence the cooking sequence and adapt the cooking result. Users can change to iProductionManager or manual mode at any time. Thanks to iCookingSuite you can simply save time, raw materials, and energy while maintaining a standardized food quality without having to check the procedure.

iProductionManager

iProductionManager intelligently and flexibly organizes the production process. This includes which products can be prepared together on different trays, the ideal sequence of dishes, and monitoring the cooking method. ProductionManager supports users with prompts to load or unload dishes. Depending on kitchen processes you can freely position orders or schedule them on the basis of a certain target time. iProductionManager arranges the sequence of dishes accordingly and automatically specifies the correct settings. Users decide whether dishes are cooked based on optimum energy consumption or a certain target time. Simple monitoring activities are no longer required, saving you working time and energy.

iCareSystem

iCareSystem is the iCombi Pro XS's intelligent cleaning and limescale removal system. It recommends the amount of chemicals and ideal cleaning stage from the nine available programs based on usage and any limescale in the steam generator. Quick interim cleaning cleans the iCombi Pro XS in less than 25 minutes. All cleaning programs can also run overnight without the need for supervision. The iCareSystem is particularly efficient and environmentally friendly, consuming small quantities of phosphate-free care products, water, and energy. This means that the iCombi Pro is always hygienically clean without manual work and at minimal costs.

Approvals

Water quality requirements

Untreated water can be 0 to 24.5 gr/gal (0 to 420ppm) hardness. We do not recommend treated water hardness < 5 gr/gal (86ppm) because the water could be corrosive. Sodium ion exchangers are not recommended; H+ Ion exchange systems are recommended. Water that does not meet the following minimum standards will require the proper conditioning

Contaminant	Water Requirements	If > than recommended
Sand / Particles	< 15 µm	Particle filter
Chlorine (Cl2)	< 0.012 gr/gal (0.2 ppm)	Active carbon filter
Chloride (Cl-)	< 4.68 gr/gal (80 ppm)	RO

Connected loads - exhaust air and thermal load

Latent heat load	966 BTU
Sensible heat emission	1280 BTU
Sound level	52 dBA

Connection loads - data

LAN data interface	RJ45
WiFi data interface	IEEE 802.11 a/g/n

Minimum distances at installation

Minimum distances	Left	Back	Right
Standard	min. 10 mm	min. 10 mm	min. 10 mm

Clearance Requirements

To facilitate servicing, we recommend leaving a 20" (500 mm) gap on the left-hand side of the unit. If there is not 20" (500 mm) left side clearance available, provisions for moving the unit to the left for service access must be made. Such provisions include, but are not limited to, having quick connections (water, gas, etc.) and lengthened electrical connections with flexible cords.

If there are no external heat sources acting on the unit, there should be a minimum gap of 1/2" (10 mm) on either side of the unit. XS Combi-Duo vent pipe can be mounted flush with the wall.

If a high temperature heat source is on the left side of the unit, clearance of at least 14" (350 mm) must be maintained on the side. This clearance may be reduced to 2" (50 mm) if a heat shield is used (see accessories). Recommended clearance from unobstructed rear exhaust pipes and any surface collecting grease or flammable material: 10" (254 mm). It is recommended to have a hood overhang of 6" (150 mm) to 18" (450 mm) at the front of the unit and 6" (150 mm) on the sides if installed at the end of the cooking line. Please refer to the Installation Manual for additional technical data and for instructions on installation and setup.

Important: Installation Tips

These installation tips are for informational purposes only and are not intended to be used as actual installation instructions. Caution: To reduce the risk associated with property damage due to water leakage:

- › Read and follow Use Instructions before installation and use of this system.
- › Installation and use must comply with all state and local plumbing codes.
- › Protect from freezing, remove filter cartridge when temperatures are expected to drop below 40°F (4.4°C).
- › Do not install on hot water supply lines. The maximum operating water temperature of this filter system is 100°F (37.8°C).
- › Water pressure range- minimum 25 to maximum 80 psi (172-552 kPa). If your water pressure exceeds 80 psi (552 kPa), you must install a pressure limiting valve. Contact a plumbing professional if you are uncertain how to check your water pressure.
- › Do not install where water hammer conditions may occur. If water hammer conditions exist you must install a water hammer arrester. Contact a plumbing professional if you are uncertain how to check for this condition.
- › The disposable filter cartridge must be replaced every 12 months, at the rated capacity or sooner if a noticeable reduction in flow rate occurs.

Warning

To reduce the risk associated with the ingestion of contaminants:
Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

RATIONAL recommends regularly scheduled maintenance and replacement of the filter cartridge(s) in order for the product to perform as advertised/sold. RATIONAL shall not be liable for system failures due to improper maintenance.

Water Conditioning.

RATIONAL Specifications.

Water Conditioning Technologies.

Particle Filter

We recommend a particle filter with fineness of 5–15 µm for filtering water containing sand, iron particles or suspended matter.

Active Carbon Filter

We recommend an active carbon filter, if the water contains high levels of chlorine (Cl₂)/Chloramine (NH₂Cl) over 0.2 ppm (0.012 mg/l). This information can be provided by water supply company.*

Reverse Osmosis

Due to corrosion risks, a reverse osmosis system must be used if and only if chloride (Cl⁻) concentrations are above 80 ppm (80 mg/l). This information can be provided by water supply company.

Note: Ensure that the minimum conductivity value of 50 µS/cm (Micro Siemens) is being maintained.

Water Softener

Valid for the iCombi Pro, iCombi Classic, and SelfCookingCenter®: these models will remove scale all by themselves providing that the units are used and cleaned as prescribed. This means a water softener typically is not needed for scale.

Valid for CombiMaster® Plus: Recommended for treating water if severe calcification occurs without high chloride contamination.

Recommend System: Weak acid decarbonization (H⁺ ion exchange).

Systems not recommended: Sodium Ion Exchangers (salt based water softeners) and Phosphate feeder filters. Treated Water must maintain a minimum 5 gr/gal hardness.

Supply Requirements.

Water Filter Connection

½" ID cold water line with a water shut off with ¾" connection. (GHT)

Water pressure to filtration system needs to maintain a minimum 25 psi. (Max 80 psi)

RATIONAL cooking systems require flow rate of 3 gallons per minute and water pressure of 21–87 psi. (Max 80 psi) (43 psi is recommended)

*All public water systems using surface water and most ground water systems treat water with either chlorine/chloramine or chlorine dioxide.

Note: EPA will allow levels as high as 4 ppm safe for drinking water, exceeding our maximum level of 2 ppm.

Elvari™ Surface-Mounted Towel Dispenser

Optional Electrocoat Finishes

Bradley offers an exclusive, proprietary electrocoat color process on the Elvari towel dispenser models. Unlike powder coating, color is applied to the entire stainless steel part using a submersion process with electrically charged particles. This process results in a precise film thickness across all surfaces, allowing the grain of the stainless steel to show through.

Electrocoat provides complete coverage to the part and has environmental advantages such as no or low-VOC and HAPs (Hazardous Air Pollutants), heavy metal-free products, and minimum waste discharge. Bradley's electrocoat is durable and easy to clean as well as fingerprint, stain and corrosion resistant. A UV light stabilizer additive enhances resistance to weathering and color fade. Products are performance tested for adhesion following ASTM D3359-22 and impact resistance following ASTM D2794.

INSTALLATION:

Units to be installed flush with 4" separation between glass. Do not use stainless trim around the perimeter for installation as this will interfere with induction performance.

Millwork Fabricator to provide support beams in between units; seal all crevices as required and follow practice outlined in national standard NSF 4. See installation detail MWK-116.

Controls to be recessed into millwork apron.

Digital Thermometer display on glass top to be oriented to operator side.

Installation to be performed by certified factory installers only - NO EXCEPTIONS

STONE COMPATIBILITY:

Units are compatible with ¾" or 1-1/4" thick standard engineered countertops – other specific countertop material can be used as recommended by manufacturer.

VENTILATION:

Each unit requires 70 CFM free air flow with adequate enclosure venting and maximum ambient temperature of 122°F. When installed in a closed cabinet, provide McNichols 16-gauge 1614381648 perforated metal mesh or equal on doors.

At location of induction generator, AC Infinity fans, models AI-CFD120BA to be utilized. All millwork fan systems should contain an intake and an exhaust fans. This is required to balance the static pressures between the inside and outside of the cabinet. Position fans near the top of the cabinet configured to exhaust out the warmer air and position fans near the bottom to pull in colder air. Refer to typical detail MWK-360 Cabinet Venting.

Provide cabinet fan for ventilation and air movement.

PROTECTION:

Generator to be installed on back wall of cabinet above floor of cabinet and enclosed in a mesh safety surround to prevent any accidental access to exposed high voltage contactors. Refer to installation detail MWK-116 for enclosure sizes.

ELECTRICAL CONNECTIONS:

All internal connections from generator to each induction plate to be interconnected by FSEC utilizing factory provided wiring harness. All wiring harness to be neatly bound and run as close as possible to top corner of cabinet with zip ties. No wiring should be hanging loose on cabinet floor.

Induction Green Heat

Models

- GI-HO/IN 1500

Built-in induction warm holding system consisting of:

Induction generator, with two heat retaining/holding zones, and two separate control units.

Equipped with the latest RTCSmp (Realtime Temperature Control System) technology.

Standard Features

Induction generator:

- A generator, developed specifically for heat retaining/holding, built in an aluminum enclosure, which includes an integrated air fan.
- Fresh air is supplied by the fan, located at the bottom of the unit. The unit is also equipped with an air guiding system that directs the hot air out of the housing. Not adhering to air circulation guidelines in the installation manual will impact the performance of the unit.
- Cable mains 1.8M (5.90').

Heat retaining plate:

- The heat retaining plate is equipped with the latest RTCSmp sensor technology which enables temperature controls in real-time. The set temperature is displayed via a 7-segment display underneath the Ceran glass. The heat retaining plate includes five (5) temperature sensors per zone. The unit has two zones that can be controlled at different temperatures.
- Space saving and compact construction with a Ceran glass on top of the unit, that allows the installation of the unit in shallow cabinets.

Control unit:

- The control switch consists of a chrome sheet metal cover with a built in power switch. The power switch is enclosed in polymer housing, with high resistance to external impacts. The control switch is connected with the generator via an RJ45 cable which is 1M (3.28').
- The control unit regulates the temperature in an increment of 5°F (1°C) and this from 122-212°F (50 to 100°C). The set temperature and the current temperature are shown via the 7-segment display that is located underneath the Ceran glass.
- Safety above all:
- RTCSmp electronic temperature control that monitors the state of the induction coil, power board, CPU and the Ceran glass temperature.
- RTCSmp monitors the energy supply
- No Pan No Heat – Only if an induction suitable pan is located on the glass that energy will be consumed.

Options & Accessories

- Optional induction ready holding pans available contact your dealer for sizes and prices.

MIRAGE® DROP-IN INDUCTION WARMERS & RETHERMALIZERS

741101

DESCRIPTION

Mirage® Drop-In Induction Warmers and Rethermalizers use innovative technology to run dry (without water) to improve food quality and minimize waste, while using a fraction of the energy. They ship with an induction-ready inset and improved ergonomic cover so they are ready to use upon arrival.

WARMER PERFORMANCE CRITERIA

Mirage® Drop-in Induction Warmers are designed to hold heated prepared foods at temperatures above the HACCP “danger zone” of 140 °F (60 °C). The performance standard is measured using the NSF mixture preheated to 165 °F (73.9 °C). The unit will hold the temperature of this product above 150 °F (65.6 °C). The temperature will be maintained best when the food product is held using pans with covers, and the food product is stirred regularly.

RETHERMALIZER PERFORMANCE CRITERIA

Mirage® Drop-In Induction Rethermalizers are designed to take a container of cooked food from a chilled state (below 40.0 °F [4.4 °C]) through the HACCP “danger zone” of 165 °F [73.9 °C] in less than 90 minutes. The performance standard is measured using the NSF mixture chilled to 35 °F (1.7 °C). The electric unit will raise the temperature of this product above 165 °F (73.9 °C) in less than 90 minutes. The temperature will be maintained above 150 °F (65.6 °C) when the food product and pan or inset are used with a standard pan or inset cover, and the food product is stirred regularly.

MetroMax Q® Polymer/Wire Shelving

Quick-to-adjust, corrosion-resistant shelving constructed of removable polymer open grid shelf mats, wire shelf frames, and corner releases. Shelf frames and steel posts have an epoxy coating over an electroplated substrate. Shelves offer a 25-year warranty against rust and corrosion. Polymer posts are rust-proof. Microban® antimicrobial product protection is built into the shelf mats. Shelf has a rigid four-sided frame with center truss(es). Robust corner provides complete 360° capture of the wedge and post for added stability. Stationary units have maximum capacity of 2,000 lbs. (907kg) evenly distributed. Mobile units (with stem casters) offer a maximum total unit load of 900 lbs. (408kg). Units assemble easily — shelves mount on four one-piece wedges along grooved, numbered posts and adjust on 1" (25mm) increments.

- **Forever Strong:** Proven corner connection and four-sided shelf frame with center truss(es) assures stability and strength in stationary, mobile, and high-density track shelving configurations.
800 lbs. (363kg) per shelf for lengths of 24" to 48" (610 to 1219mm)
600 lbs. (272kg) per shelf for lengths of 54" (1372mm) or longer
Stationary unit: 2000lbs (907kg) evenly distributed.
Mobile unit (with stem casters): Up to 900lbs. (408kg).
Multiply the caster load rating by 3 to determine actual rating.
- **Long life Rust Resistance:** Shelves offer a 25-year limited corrosion warranty and are combined with rust proof polymer posts.
- **Easy to Clean and Maintain:** Polymer mats can be easily removed and cleaned in a sink or commercial washer/dish machine.
- **Microban® Antimicrobial Product Protection** is built into the shelf mats to help fight the growth of stain and odor-causing bacteria, fungi, mold, and mildew to keep product cleaner between cleanings.
- **Quick-to-Adjust:** Patented corner release allows shelves to be adjusted without tools. Simply flip each corner release, relocate the wedge connectors on the posts, and reposition the shelf. Quickly adjust shelves to reclaim wasted vertical space.
- **Efficient Use of Space:** Shelves adjust on 1" (25mm) increments along the post to maximize the use of available vertical space.
- **Fast, Easy Assembly:** Shelves are ready to use right out of the box. One-piece wedges securely attach to the posts. Raised beads on the back of each wedge snap into grooves on the post. Window on wedge aligns with numbers on the post to locate the desired shelf position. Shelf mounts on four wedges. A unit can be assembled without tools in minutes.
- **Interchangeable:** Part of the MetroMax platform, MetroMax Q shelves are compatible on the same shelving units with MetroMax i and MetroMax 4 shelves.
- **Open Grid and Solid Mat Options:** MetroMax Q is available with open grid mats. Open grid shelves promote air circulation and light penetration. If a solid shelf is required, MetroMax i or MetroMax 4 solid shelves may be added to the MetroMax Q unit.
- **NSF Listed** for all environments.
- **Optional Accessories** are on spec sheet 9.25.

Material Specifications:

- **Shelf Mats:** Injection-molded polypropylene with exclusive built-in Microban® antimicrobial product protection.
- **Shelf frames:** Steel with electroplated substrate and highly durable, abrasion-resistant epoxy finish.
- **Polymer posts:** Pultrusions – continuous glass fibers and thermoset resin composite; adjustable foot and socket – reinforced nylon.
- **Epoxy-coated posts:** Steel with electroplated substrate and highly durable, abrasion-resistant epoxy finish.
- **Temperature range:** -20°F (-29°C) to 125°F (52°C) continuous use, with intermittent exposure to 200°F (93°C) for cleaning.

MetroMax Q® Polymer/Wire Shelving

Quick-to-adjust, corrosion-resistant shelving constructed of removable polymer open grid shelf mats, wire shelf frames, and corner releases. Shelf frames and steel posts have an epoxy coating over an electroplated substrate. Shelves offer a 25-year warranty against rust and corrosion. Polymer posts are rust-proof. Microban® antimicrobial product protection is built into the shelf mats. Shelf has a rigid four-sided frame with center truss(es). Robust corner provides complete 360° capture of the wedge and post for added stability. Stationary units have maximum capacity of 2,000 lbs. (907kg) evenly distributed. Mobile units (with stem casters) offer a maximum total unit load of 900 lbs. (408kg). Units assemble easily — shelves mount on four one-piece wedges along grooved, numbered posts and adjust on 1" (25mm) increments.

- **Forever Strong:** Proven corner connection and four-sided shelf frame with center truss(es) assures stability and strength in stationary, mobile, and high-density track shelving configurations.
800 lbs. (363kg) per shelf for lengths of 24" to 48" (610 to 1219mm)
600 lbs. (272kg) per shelf for lengths of 54" (1372mm) or longer
Stationary unit: 2000lbs (907kg) evenly distributed.
Mobile unit (with stem casters): Up to 900lbs. (408kg).
Multiply the caster load rating by 3 to determine actual rating.
- **Long life Rust Resistance:** Shelves offer a 25-year limited corrosion warranty and are combined with rust proof polymer posts.
- **Easy to Clean and Maintain:** Polymer mats can be easily removed and cleaned in a sink or commercial washer/dish machine.
- **Microban® Antimicrobial Product Protection** is built into the shelf mats to help fight the growth of stain and odor-causing bacteria, fungi, mold, and mildew to keep product cleaner between cleanings.
- **Quick-to-Adjust:** Patented corner release allows shelves to be adjusted without tools. Simply flip each corner release, relocate the wedge connectors on the posts, and reposition the shelf. Quickly adjust shelves to reclaim wasted vertical space.
- **Efficient Use of Space:** Shelves adjust on 1" (25mm) increments along the post to maximize the use of available vertical space.
- **Fast, Easy Assembly:** Shelves are ready to use right out of the box. One-piece wedges securely attach to the posts. Raised beads on the back of each wedge snap into grooves on the post. Window on wedge aligns with numbers on the post to locate the desired shelf position. Shelf mounts on four wedges. A unit can be assembled without tools in minutes.
- **Interchangeable:** Part of the MetroMax platform, MetroMax Q shelves are compatible on the same shelving units with MetroMax i and MetroMax 4 shelves.
- **Open Grid and Solid Mat Options:** MetroMax Q is available with open grid mats. Open grid shelves promote air circulation and light penetration. If a solid shelf is required, MetroMax i or MetroMax 4 solid shelves may be added to the MetroMax Q unit.
- **NSF Listed** for all environments.
- **Optional Accessories** are on spec sheet 9.25.

Material Specifications:

- **Shelf Mats:** Injection-molded polypropylene with exclusive built-in Microban® antimicrobial product protection.
- **Shelf frames:** Steel with electroplated substrate and highly durable, abrasion-resistant epoxy finish.
- **Polymer posts:** Pultrusions – continuous glass fibers and thermoset resin composite; adjustable foot and socket – reinforced nylon.
- **Epoxy-coated posts:** Steel with electroplated substrate and highly durable, abrasion-resistant epoxy finish.
- **Temperature range:** -20°F (-29°C) to 125°F (52°C) continuous use, with intermittent exposure to 200°F (93°C) for cleaning.

EVERPURE® KLEENWARE® HTS-11 SYSTEM

SCALE PREVENTION AND CORROSION CONTROL FOR WAREWASHING EQUIPMENT

Kleenware HTS-11 System: EV9799-11

HT-10 Replacement Cartridge: EV9799-22

APPLICATIONS

Commercial dishwashers
Commercial glassware washers
Warewashing booster heaters

FEATURES • BENEFITS

Inhibits mineral deposits and provides corrosion protection
Extends the life of expensive foodservice equipment
Specially designed flow through head assures consistent, predictable product feed rates
Scale control system features HydroBlend™

Opaque (red) high temperature bowl allows for hot water [up to 170°F (76.6°C)] feed installations

Transparent replacement cartridge containing HydroBlend™ scale inhibitor, which is effective up to 200°F (93.3°C)

INSTALLATION TIPS

The HTS-11 system must be used as a unit (i.e. high temperature bowl, head and cartridge).

Install vertically using the mounting bracket provided.

Use 3/4" water line and observe proper inlet/outlet water directions.

Some pressure relief mechanism should be provided downstream of the system to permit releasing line pressure when changing cartridges.

Deliming of equipment prior to installation is recommended, but not required.

OPERATION TIPS

Inspect HT-10 cartridge at least every six (6) months for replacement.

Pre-existing equipment scale may be dislodged and settle to the bottom of a chamber which can clog drain initially. Remove any settled scale.

In new installations, the HydroBlend™ usage rate may start high, but will reduce as existing scale is removed.

Replace HT-10 cartridge before HydroBlend™ compound is completely used up.

Super Erecta® Shelf Wire Shelving

- **Unique Design:** The open wire design of these shelves minimizes dust accumulation and allows free circulation of air, greater visibility of stored items and greater light penetration.
- **Durable Construction:** Super Erecta® shelves and posts are constructed of heavy-gauge carbon steel or Type 304 stainless steel.
- **Choice of Finishes:** Super Erecta Brite™ and chrome-plated for dry storage; Metroseal™ Epoxy (green or gray), and Type 304 stainless steel for corrosive environments; and attractive epoxy color options for merchandising applications.
- **Metroseal:** Proprietary rust-resistant finish is a durable epoxy coating over a protective zinc substrate. Metroseal contains Microban® antimicrobial product protection that helps fight the growth of stain and odor-causing bacteria to keep product cleaner between cleanings. 15-year limited warranty against rust and corrosion. NSF listed for wet environments.
- **Versatile:** Super Erecta® Shelf wire shelving can adapt to your changing needs. By using various accessories, hundreds of shelving configurations become possible.
- **Fast, Secure Assembly:** SiteSelect® Posts have a double groove visual guide feature every 8" (203mm), circular grooves at 1" (25mm) increments, and are numbered at 2" (50mm) intervals. A patented, tapered split sleeve snaps together around each post. Tapered openings in the shelf corners slide over the tapered split sleeves providing a positive lock. Shelf is assembled in minutes without the use of any special tools.
- **Adjustability:** Shelves can be adjusted at 1" (25mm) intervals along the entire length of the post.
- **Shelf Ribs:** Run front to back, allowing you to slide items on and off shelves smoothly.

Super Erecta® Shelf Wire Shelving

- **Unique Design:** The open wire design of these shelves minimizes dust accumulation and allows free circulation of air, greater visibility of stored items and greater light penetration.
- **Durable Construction:** Super Erecta® shelves and posts are constructed of heavy-gauge carbon steel or Type 304 stainless steel.
- **Choice of Finishes:** Super Erecta Brite™ and chrome-plated for dry storage; Metroseal™ Epoxy (green or gray), and Type 304 stainless steel for corrosive environments; and attractive epoxy color options for merchandising applications.
- **Metroseal:** Proprietary rust-resistant finish is a durable epoxy coating over a protective zinc substrate. Metroseal contains Microban® antimicrobial product protection that helps fight the growth of stain and odor-causing bacteria to keep product cleaner between cleanings. 15-year limited warranty against rust and corrosion. NSF listed for wet environments.
- **Versatile:** Super Erecta® Shelf wire shelving can adapt to your changing needs. By using various accessories, hundreds of shelving configurations become possible.
- **Fast, Secure Assembly:** SiteSelect® Posts have a double groove visual guide feature every 8" (203mm), circular grooves at 1" (25mm) increments, and are numbered at 2" (50mm) intervals. A patented, tapered split sleeve snaps together around each post. Tapered openings in the shelf corners slide over the tapered split sleeves providing a positive lock. Shelf is assembled in minutes without the use of any special tools.
- **Adjustability:** Shelves can be adjusted at 1" (25mm) intervals along the entire length of the post.
- **Shelf Ribs:** Run front to back, allowing you to slide items on and off shelves smoothly.
- **Shelf Accessibility:** Shelves can be loaded/unloaded easily from all sides. This open construction allows maximum use of storage cube.
- **Adjustable Feet:** Bolt levelers compensate for surface irregularities.

Note: Stainless stationary posts are equipped with stainless steel leveling feet.

*When a BUNN is machine rated 120/208-240V, 120/208V or 120/240V, the higher voltage is the supply voltage needed to power the machine. The 120V is there to supply power to some components rated 120V in the machine, but it is not the supply voltage and would not power the machine if the machine is marked with the before mentioned ratings.
